

The Ready To Focus **home based program** is available anywhere in the world. You will be trained to use our neurofeedback equipment in your own home and be able to run an unlimited amount of sessions per participant. Home based is perfect for the participant(s) that desire a large amount of sessions, for families with multiple participants running at the same time, and for those who desire the convenience of the equipment in the home.

The training program is customized to each participant's unique needs in order to ensure a high rate of success. You will work closely with our home based trainer to learn how to use the equipment properly and follow our training protocol. You will discuss progress weekly with a clinician who will adjust the training as needed and review your progress.

Included in program:

- EEG Unit and laptop computer (to be returned upon completion)
- Comprehensive training and support
- Online monitoring of sessions and technical support
- Weekly sessions with clinician to discuss clinical progress
- Weekly behavioral assessments
- Re-testing at regular intervals to assess progress
