

The Ready To Focus **office based program** is in the Holland area via our partnership with [Winning At Home](#) (assessments and office lab).

Training will be administered by a Ready To Focus technician or the clinical director with the training protocol individualized to your specific needs as identified in the initial consultation. You will discuss progress with one of our clinical directors each month while in the program. The office-based program is perfect for participants who desire a technician for each session, who can commit to 2 sessions per week, and who are within a reasonable distance from one of our several locations.

Included in program:

- 2 office appointments each week (40 min each appointment)
- Brief session report from technician
- Scheduled appointment with clinical director every four weeks to review progress
- Weekly behavioral assessments
- Re-testing at regular intervals to measure progress
